Software Engineer / Programmer (Junior or Experienced)

ProSys Development Services, a well-established electronics and software company, has an exciting opportunity for a proactive and capable Software Engineer / Programmer to join the team based in Reigate.

Formed in 1991, ProSys Development Services is a family business specialising in electronics and software development in a number of markets. To support our growing development team on existing and new products, we are looking for a talented Software Engineer / Programmer to assist in expanding our product markets.

This is a great opportunity to work for an organisation where you will really be able to influence the design work and make a difference to the product ranges moving forward.

Key Responsibilities:

- Designing, developing and testing new applications
- Supporting and updating existing and legacy applications
- Supporting new product introduction
- Identifying opportunities for improvements in product / software functionality

About you:

- Required proven experience of:
 - C#, .NET Framework
 - SOAP/REST/Web Services
 - SQL Server development
- Ability to demonstrate relevant university, personal or even released projects as part of the selection process
- Good communication skills

Not essential, but good to have:

- Android Application Development

- Linux
- Basic knowledge of electronics
- Embedded firmware development

Benefits:

- Competitive Salary
- Profit share scheme (after 1 full year's employment)
- Private medical insurance
- Statutory Employer pension contributions
- Cycle to Work Scheme
- Free on-site Parking

Sounds interesting? Send us your CV.

Candidates with previous experience or job titles including; C# Developer, Junior Software Engineer, .Net Developer, Junior Programmer, Software Developer, may also be considered for this role.
